

Deploy BarTender your way

BarTender can be deployed locally, in the cloud, or as any hybrid combination to meet your specific business needs.

BarTender Software (on-premises)

Optimize productivity with powerful security and always-on high availability, ensuring the ultimate level of confidence. Available in four editions.

When to choose BarTender software (on-premises)

- Have available IT resources
- Trigger printing by a connected device automatically
- Run large scale print jobs with high performance and low latency
- Minimize risks of poor internet connection and performance

Each higher edition/plan supports all features included in the edition/plan preceding it.

Enterprise

Streamline teams and drive accountability

- Centralize label and document storage management
- Enable version control of files and documents
- Avoid unauthorized print runs with enterprise-level security and permissions
- Manage complete audit trails and logs
- Enable comprehensive traceability
- High availability with enhanced reliability

Automation

Boost productivity with flexible, automated labeling

- Automate label printing with flexible integrations
- Automate labeling printing using advanced methodologies including REST API
- Build custom integrations – no coding required
- Reprint lost or damaged labels

Professional

Enable digital intelligence with dynamic data

- Connect external data to create dynamic templates
- Print labels on-demand from any device or BarTender Mobile App
- Minimize errors with data entry forms
- Encode RFID tags, cards, etc.
- Choose between per-printer or per-user licensing

Starter

Design and print labels in minutes

- Design simple barcode labels with minimal training
- Ensure compliance with pre-built templates
- Be up and running in minutes
- Print to unlimited printers from a single user

BarTender Cloud

Create, manage, and print labels from anywhere - without the need for additional IT infrastructure and resources. Available in two plans.

When to choose BarTender Cloud

- Print labels remotely and from multiple locations
- Provide printing access to external/semi-public parties
- Have seasonal or temporary label print volume
- Deploy a labeling solution quickly

Automation

Enhance flexibility across your labeling operations

- Automate label printing and other repetitive print-related workflows
- Enable version control of files and documents
- Streamline label template management with dedicated spaces
- Protect mission-critical labeling with available 24/7/365 coverage add-on

Essentials

Start printing without additional IT resources

- Design anywhere, anytime using the cloud-based designer
- Centralize label and document management
- Connect to cloud databases and local files
- Get started in minutes – with minimal software installation
